Experience

Yardi Software | Pune, India

Software Engineer

07/2024 - Current

- Collaborated on API integration projects using .NET and SQL technologies to enhance system functionality.
- Gather business requirements directly from clients and translate them into technical solutions.
- Develop and maintain client-specific customizations within Yardi products.
- Engaged in the implementation of the YSR reporting tool and Filldoc for E-Signature to facilitate electronic signatures.
- **Gained international client exposure through onsite collaboration and business discussions. Successfully delivered multiple client customization requests. Improved solution delivery through requirement analysis and technical design.**

Scrap Yard India | Aurangabad

Team Lead Trainer

05/2021 - 06/2024

- Managed project planning, development, and execution to ensure timely delivery of startup product.
- Led team of 5 in developing startup product, fostering collaboration and innovation.
- Successfully presented the business idea and product to Maheshwari Shark Tank for funding consideration.
- Gained practical experience in startup operations and product development, contributing to business strategy.

Projects

- **Ejari Integration with Yardi** Developed integration between Yardi and the Dubai Government Ejari Portal Automated the exchange of tenant, lease, and property information between systems. Enabled retrieval of legally approved tenancy contracts from Ejari into Yardi.
- **ALJ E-Invoicing Integration (Saudi Arabia)** Implemented integration between Yardi and Saudi Arabia's e-invoicing ecosystem. Automated invoice submission workflows for regulatory compliance. Processed invoice data and exchanged information with external government-authorized systems.

- Salesforce Integration with Yardi Developed integration to receive and process tenant-related data from Salesforce. Designed data synchronization processes between Salesforce and Yardi platforms. Enhanced data consistency across customer-facing and operational systems.
- Power BI Implementation with Yardi

Awards & Honors

- International client exposure through onsite engagement in Dubai.
- Published technical courses on Udemy for students and aspiring developers. Active contributor to technical communities, and continuous learner of emerging technologies.
- Invited as a jury member for a hackathon conducted by MGM University.

Education and Training

MGM University | Aurangabad
Bachelor of Engineering in IT
06/2024
